

DANISH HYBRID (LY/YL)

THE BEST SOW FOR FINISHER PRODUCTION

The Danish Hybrid F1 (LY/YL) sow is our cross between a Danish Yorkshire and a Danish Landrace. With great genetics from both parents, we at Danish Genetics creates the most ideal sow for finisher production. Our customers who inseminate the Danish Hybrid with Danish Duroc semen will achieve the greatest production returns and effectiveness.

Great results for DLY Finishers

- Longevity: number of litters
- Low feed consumption
- Robust finishers
- High value carcass quality

F1 (LY/YL) with Great Mothering Abilities

- Fertility: number of piglets
- Easy to handle
- Uniformity in litter size and birthweight
- Viable piglets

DANISH GENETICS' HYBRID		
Weaned piglets per litter		
2022	Best	16,53
	Average	15,23
2020	Best	16,39
	Average	15,13
2018	Best	15,91
	Average	14,98

* Statistics are based on farms worldwide totaling 100,000+ sows per year.

Number of pigs, D+LY Q1-2023	DK Farm 1 16.765 pigs	DK Farm 2 9.118 pigs	DK Farm 3 17.269 pigs	DK Farm 4 12.926 pigs
Daily weight gain large	1103 g/day	1123 g/day	1031 g/day	1054 g/day
FCR (kg/kg)*	2,61	2,51	2,66	2,42
Slaughterweight	112,8 kg	112,2 kg	117,4 kg	117,5 kg
Meat percentage	61,3 %	61,5 %	61,6 %	62,3 %

* Due to variations in feed composition and nutritional properties, FCR measured in kg/kg may not be directly comparable across different customers, especially internationally.
